

Nutrition is not just about analysis, but nutrient availability.

Our chelate complex liquids are designed to penetrate the leaf quickly and effectively, *But* not deposit harmful chlorides or damaging salts, which can cause plant damage and encourage fungal and insect attack.

Liquid Kelp

Concentrated Liquid Ocean Kelp, Naturally Cold processed for ease of mixing with water and fast leaf response. High in Trace elements, Potassium, Natural Plant Hormones & Sugars.

Liquid VHumus & BA Microbes

Contains beneficial bacteria & fungi (VA Mychoriza). This product is designed to populate the soil with specific beneficial microbes that can quickly boost plant productivity in tired soils, & improve longterm soil health.

Eco-Humate

Liquid Humic Acid (alkali pH), lifts soil Cation Exchange Capacity (CEC).

- Improves Nutrient availability ie. Phosphorus in High reactive Iron soils
- Reduce Nutrient leaching, ie. Potassium and Ammonium Nitrogen
