Fertiliser for Life

BKH RANGE SF-14 / SF-30 / SF-35

High Boron, Potassium & Humate blends

KEY BENEFITS:

- Superior crop yield
- Improved soil porosity, infiltration & water holding
- Biologically Activated

The BKH range is rich in natural minerals and enhanced with the addition of Eco Advance® Biology, Potassium Humate and Boron. The range enables nutrient uptake whilst encouraging a symbiotic relationship between plants and soil microbiology. Eco Advance® biology works in conjunction with Potassium Humates to deliver Nitrogen in a sustained release. The BKH range also has added Silicon, Calcium and trace elements plus fortified levels of Boron and Potassium Humate. All these elements combine to create an environment where the soil biology can thrive and improve plant vigour.

The result is faster, longer lasting complete nutrition, creating strong consistent growth over mixed soil types and robust plants to tolerate varied environmental conditions. Plus, long term benefits including improved soil conditions from biological activity, compaction relief, deeper root growth, healthier plants and humus increases.

Feed the soil
to feed the plant

Nutrition is not just about analysis, but nutrient availability and Eco Advance® makes the connection between fertiliser, soil and plant in a powerful symbiotic relationship.

Eco Advance® premium biology is a proprietary blend of beneficial biology and bio-stimulants that have been developed by Eco Growth over the past 20 years. Including beneficial microbe strains such as Fungi and Bacillus (ie: *B.megaterium* and *B.subtilis*). Eco Advance® is a specially formulated blend of targeted microbiology that improves nutrient availability, soil structure, increased resistance and buffering capacity along with many other soil and plant benefits.

COMPLEMENT YOUR GRANULAR PROGRAM WITH OUR PREMIUM LIQUID FERTILISERS

Our chelate complex liquids are designed to penetrate the leaf quickly and effectively, but not deposit harmful chlorides or damaging salts, which can cause plant damage and encourage fungal and insect attack.

Eco-Vital®

A Commercial Strength Liquid Seaweed & Fish Fertiliser designed for a fast response.

Rich in natural Nitrogen, Phosphorous, Potassium, Calcium, 15+ Trace / Rare-Earth elements, +natural growth regulators.

Express NPK

A premium, fast acting and complete liquid fertiliser providing highly available N, P & K with a balance of chelated Trace Elements.

Ideal for a wide variety of crops and plants, Express® NPK improves fruit size whilst maintaining colour & quality.

Eco-Humate

Liquid Humic Acid (alkali pH), lifts soil Cation Exchange Capacity (CEC).

Holds water and boosts nutrient availability in the soil, by forming a humus complex. Protects plants from salts and toxins such as Aluminium, whilst boosting beneficial microbe activity.
