Fertiliser for Life

BLUE

Sustained release, rock-mineral based fertiliser

KEY BENEFITS:

- **Balanced macro & trace nutrients**
- **Stabilised Nitrogen**
- **Low leaching**
- **Biologically Activated**

Blue is a complete and balanced rock mineral-based fertiliser designed for use in all soil types and across a broad range of landscape and horticultural applications including ornamentals, vegetable production, orchards and vineyards.

Enhanced with our Eco Advance® premium biology - including mycorrhizal fungi and nitrogen-fixing bacteria - Blue stimulates root development, shoot growth and fruiting quality through natural ingredients including mineral-based phosphorus and potassium, coupled with balanced calcium, magnesium and trace elements.

The inclusion of carbon stabilised nitrogen improves nitrogen utilisation and minimises potential losses to the environment.

For best results, use in conjunction with Eco Growth's Eco-Wet®.

TYPICAL ANALYSIS

Blue	w/w%		mg/kg
Nitrogen (N)	9.1	Zinc (Zn)	1055
Phosphorus (P)	1.1	Manganese (Mn)	1839
Potassium (K)	7.4	Copper (Cu)	515
Sulphur (S)	10.2	Molybdenum (Mo)	6
Calcium (Ca)	7.5	Boron (B)	9
Magnesium (Mg)	1.4	Cobalt (Co)	4
Iron (Fe)	1.1	Selenium (Se)	0.3
Silicon (Si)	5.8		
Carbon (C)	2.5		

CROP/PLANT TYPE	RATE	TIMING
Orchards	75-100g per year age of tree up to 500g/tree	Quarterly or as required
Vines	250-350kg/ha 125-150kg/ha	Apply under vine Aug-Sept Broadcast over inter-row Apr-May
Vegetables	450-500kg/ha	Repeat as required
Residential Ornamentals	50g/m ²	Every 8-12 weeks or as required
Residential Natives	35-50g/m ²	Quarterly or as required
Residential Vegetables	80-100g/m ²	Every 6-8 weeks or as required

AVAILABLE IN 10KG, 25KG & 500KG/1 TONNE BULKA BAGS | FOR ALTERNATIVE USES OR APPLICATIONS PLEASE CONTACT YOUR ECO GROWTH® NUTRITIONAL EXPERT.

Feed the soil
to feed the plant

Soils are diverse and complex living ecosystems. Biologically driven soil processes provide plant nutrition and their presence are a key indicator of overall soil health and functioning. Without biology, soils are simply geology.

Biologically active soils are the cornerstone of healthy, resilient and sustainable agricultural production systems. When functioning effectively, soil microbe-plant root interactions positively influence plant health and productivity. Microbial activity in the rhizosphere surrounding plant roots stimulates soil building processes and enhances mineral availability.

Eco Growth's Eco Advance® Premium Biology is our proprietary granular fertiliser inoculum, containing select strains of beneficial soil microbes and complementary bio-stimulants. This powerful microbial primer/catalyst works by kick-starting soil microbial activity. As a result, microorganism-based processes are supported that have many soil and plant benefits, including natural mineral cycling, enhanced nutrient release and delivery, improved soil structure and moisture retention, and increased overall plant health and resilience.

COMPLEMENT YOUR GRANULAR PROGRAM WITH OUR PREMIUM LIQUID FERTILISERS

Our chelate complex liquids are designed to penetrate the leaf quickly and effectively, but not deposit harmful chlorides or damaging salts, which can cause plant damage and encourage fungal and insect attack.

Eco-Vital®

A Commercial Strength Liquid Kelp & Fish Fertiliser designed for a fast response.

Rich in natural Nitrogen, Phosphorous, Potassium, Calcium, 15+ Trace / Rare-Earth elements, +natural growth regulators.

Express NPK

A premium, fast acting and complete liquid fertiliser providing highly available N, P & K with a balance of chelated Trace Elements.

Ideal for a wide variety of crops and plants, Express® NPK improves fruit size whilst maintaining colour & quality.

Eco-Humate

Liquid Humic Acid (alkali pH), lifts soil Cation Exchange Capacity (CEC).

Holds water and boosts nutrient availability in the soil, by forming a humus complex. Protects plants from salts and toxins such as Aluminium, whilst boosting beneficial microbe activity.

Express TE

A complete, complexed liquid trace element fertiliser fortified with nitrogen and magnesium.

Replenishes essential micronutrients required for healthy metabolic function and balanced development.

Express PK

Liquid phosphorus, potassium and trace element fertiliser for rapid correction of P & K deficiencies.

A highly plant available and versatile liquid, Express PK can also be used to improve salt tolerance, reduce splitting, and harden and colour fruit.

Express Potassium Silicate

Liquid silica increases plant strength and enhances overall resilience.

Increases nutrient utilisation, improves resistance to pests & diseases and tolerance to aluminium toxicity, salinity, frost and heat stress.
