Fertiliser for Life

# BLUE (SF30)

**General-purpose, complete rock-mineral based fertiliser**

## KEY BENEFITS:

- **Balanced nutrition**
- **Gentle response**
- **Nutrient dense**
- **Biologically Activated**

Blue (SF30) is a complete and balanced rock-mineral based fertiliser designed for general purpose use across a broad range of landscape applications, horticultural crops and soil types.

Enhanced with our Eco Advance® Premium Biology - including mycorrhizal fungi and Nitrogen-fixing bacteria - Blue (SF30) stimulates root development, shoot growth and fruiting quality through natural ingredients including volcanic mineral based NPK, coupled with balanced Calcium, Magnesium and trace elements.

## TYPICAL ANALYSIS

Blue (SF30)	w/w%		mg/kg
Nitrogen (N)	5.2	Zinc (Zn)	167
Phosphorus (P)	6.0	Manganese (Mn)	659
Potassium (K)	6.1	Copper (Cu)	58
Sulphur (S)	3.0	Molybdenum (Mo)	8
Calcium (Ca)	10.5	Boron (B)	24
Magnesium (Mg)	0.2	Cobalt (Co)	10
Iron (Fe)	1.6	Selenium (Se)	1
Silicon (Si)	12.7		
Carbon (C)	3.9		

## CROP/PLANT TYPE

## RATE

## TIMING

- General vegetables	50-100g/m <sup>2</sup>	Repeat every 28 days
- Flowers and Roses	50g/m <sup>2</sup>	As required
- Turf	50g/m <sup>2</sup>	Every 6-8 weeks
Stone / Pome Fruit	500g/tree	As required.
Horticulture	250-500kg/Ha	As required depending on crop requirements
Wine Grapes	250-350kg/Ha 150kg/Ha	Apply under vine Aug-Sep Broadcast over inter-row Apr-May

AVAILABLE IN 25KG & 500KG/1 TONNE BULKA BAGS | FOR ALTERNATIVE USES OR APPLICATIONS PLEASE CONTACT YOUR ECO GROWTH® NUTRITIONAL EXPERT.

Eco Growth is Australia's leading manufacturer of biologically activated fertilisers

Feed the soil  
to feed the plant

Soils are diverse and complex living ecosystems. Biologically driven soil processes provide plant nutrition and their presence are a key indicator of overall soil health and functioning. Without biology, soils are simply geology.

Biologically active soils are the cornerstone of healthy, resilient and sustainable agricultural production systems. When functioning effectively, soil microbe-plant root interactions positively influence plant health and productivity. Microbial activity in the rhizosphere surrounding plant roots stimulates soil building processes and enhances mineral availability.

Eco Growth's Eco Advance® Premium Biology is our proprietary granular fertiliser inoculum, containing select strains of beneficial soil microbes and complementary bio-stimulants. This powerful microbial primer/catalyst works by kick-starting soil microbial activity. As a result, microorganism-based processes are supported that have many soil and plant benefits, including natural mineral cycling, enhanced nutrient release and delivery, improved soil structure and moisture retention, and increased overall plant health and resilience.

## COMPLEMENT YOUR GRANULAR PROGRAM WITH OUR PREMIUM LIQUID FERTILISERS

Our chelate complex liquids are designed to penetrate the leaf quickly and effectively, but not deposit harmful chlorides or damaging salts, which can cause plant damage and encourage fungal and insect attack.

### Eco-Vital®

A Commercial Strength Liquid Kelp & Fish Fertiliser designed for a fast response.

Rich in natural Nitrogen, Phosphorous, Potassium, Calcium, 15+ Trace / Rare-Earth elements, +natural growth regulators.

### Express NPK

A premium, fast acting and complete liquid fertiliser providing highly available N, P & K with a balance of chelated Trace Elements.

Ideal for a wide variety of crops and plants, Express® NPK improves fruit size whilst maintaining colour & quality.

### Eco-Humate

Liquid Humic Acid (alkali pH), lifts soil Cation Exchange Capacity (CEC).

Holds water and boosts nutrient availability in the soil, by forming a humus complex. Protects plants from salts and toxins such as Aluminium, whilst boosting beneficial microbe activity.

### Express TE

A complete, complexed liquid trace element fertiliser fortified with nitrogen and magnesium.

Replenishes essential micronutrients required for healthy metabolic function and balanced development.

### Express PK

Liquid phosphorus, potassium and trace element fertiliser for rapid correction of P & K deficiencies.

A highly plant available and versatile liquid, Express PK can also be used to improve salt tolerance, reduce splitting, and harden and colour fruit.

### Express Potassium Silicate

Liquid silica increases plant strength and enhances overall resilience.

Increases nutrient utilisation, improves resistance to pests & diseases and tolerance to aluminium toxicity, salinity, frost and heat stress.
