Fertiliser for Life

# ECO-VITAL®

## A premium natural fertiliser

### KEY BENEFITS:

- Contains plant and beneficial microbe stimulants
- Improves crop productivity and finish quality
- Reduces plant stress
- Feeds both plant and soil

Eco-Vital® is a premium natural kelp and fish fertiliser with plant extracts that delivers rapid results. It contains nutrients in a naturally chelated form. Chelates are known to be up to 90% more efficiently absorbed by plants than raw elemental fertilisers. This makes the required rates lower and the speed of their absorption and utilisation higher.

Eco-Vital® increases crop production, improves quality, reduces plant stress and feeds both the plant and soil. Rich in natural Nitrogen, Phosphorous, Potassium and over 15 trace elements, Eco-Vital® is the premium choice.
