Fertiliser for Life

# PRIME EMERALD LAWNS

## Rock mineral fertiliser for thick, green lawns

### KEY BENEFITS:

- Sustained Release
- Low Leaching
- Biologically Activated

Eco Growth Prime Emerald Lawns is a complete rock mineral NPK fertiliser impregnated with beneficial microbes. Eco Growth Prime Emerald Lawns is designed to enhance lawn surfaces by providing balanced nutrition and strong root growth.

Colour is enriched in the leaf surface by increasing photosynthesis through trace balance and controlled macro release. Root stimulation is achieved through a combination of natural ingredients such as mineral based NPK, Humates and Eco Advance® premium biology including Mycorrhizal fungi.

Eco Growth Prime Emerald Lawns are thicker and harder wearing due to enhanced tissue strength and stronger roots, resulting in a tighter knitted lawn and consistent surface in a wide range of conditions.

For best results, use in conjunction with Eco Growth's Eco-Wet®.

Though not likely to burn grass, fertiliser should be washed in at first opportunity. Safe for use on soft leaf buffalo lawns. Fertiliser may burn broad leaf plants such as clover, avoid leaving on leaf to prevent burn. May stain hard surfaces if watered on - Sweep area thoroughly before watering in.

### TYPICAL ANALYSIS

Standard prill (15-1-7-12)

	w/w%
<b>Nitrogen (N)</b>	<b>15.1%</b>
N as ammonium	5.9%
N as urea	9.1%
N as mineral complex	0.1%
<b>Phosphorus (P)</b>	<b>0.9%</b>
P as water soluble	0.1%
P as citrate soluble	0.5%
P as citrate insoluble	0.3%
<b>Potassium (K)</b>	<b>7.1%</b>
K as sulphate	7.0%
K as mineral complex	0.1%
<b>Sulphur (S)</b>	<b>11.7%</b>
S as sulphate	11.1%
S as mineral complex	0.6%
<b>Calcium (Ca)</b>	<b>5.5%</b>
Ca as carbonate	0.9%
Ca as sulphate	0.5%
Ca as phosphate	3.9%
Ca as mineral complex	0.2%

	w/w%
<b>Magnesium (Mg)</b>	<b>1.0%</b>
Mg as sulphate	0.6%
Mg as mineral complex	0.4%
<b>Silicon (Si)</b> as silicate complex	3.8%
<b>Carbon (C)</b> as complex	2.1%
<b>Iron (Fe)</b>	0.8%
Fe as sulphate	0.5%
Fe as mineral complex	0.3%
<b>Manganese (Mn)</b>	<b>0.5%</b>
Mn as sulphate	0.45%
Mn as mineral complex	0.05%
<b>Zinc (Zn)</b> as mineral complex	0.01%
<b>Boron (B)</b> as mineral complex	0.0008%
<b>Copper (Cu)</b> as mineral complex	0.006%
<b>Molybdenum (Mo)</b> as mineral complex	0.0005%
<b>Cobalt (Co)</b> as mineral complex	0.0003%
<b>Selenium (Se)</b> as mineral complex	0.0001%
