Typical uses and benefits include:

- Designed to combat bi-annual bearing
- Maintain size with increased yield
- Encourage strong, healthy trees
- Safe to apply during flowering and fruit set
- Builds soil biology & strengthens roots
- Suits most spreader types
- Biologically Activated

Developed from over 20 years of infield use, Avocado has been specifically created for the Avocado industry as it boasts a high analysis, yet is safe to use through delicate parts of the season such as flowering and fruit set. Avocado provides a very simple one-step complete nutritional benefit, including Nitrogen – without causing tree or soil imbalances.

Matching nutrition to your crop's needs all season is the key to happier, healthier trees. Reduce fruit drop and maximise size, consistency and yield with a complete balance of key nutrients (not just Nitrogen) with Avocado, from our range of Ecogrowth avocado fertilisers.

Silicates harden roots and this element is supplied through Avocado (which is a Silicate mineral fertiliser). It is possible to harden avocados against root damage, especially in the presence of subsoil Aluminium.

fertiliser for life

AVAILABLE IN 20KG & 500KG/1 TONNE BULKA BAGS

For alternative applications or to arrange a soil/plant test please contact your Ecogrowth® nutritional expert.

AVOCADO

Balanced fertiliser designed specifically for avocados
