## Typical uses and benefits include:

- Designed to combat bi-annual bearing
- Maintain size with increased yield
- Encourage strong, healthy trees
- Safe to apply during flowering and fruit set
- Builds soil biology & strengthens roots
- Suits most spreading equipment

Matching nutrition to your crop's needs all season is the key to happier, healthier trees. Reduce fruit drop and maximise size, consistency and yield with a complete balance of key nutrients (not just Nitrogen) with Ecogrowth avocado tree fertilisers and other granular and liquid fertiliser solutions.

**NPK** - Eco-Prime® Avocado is ideal as it boasts a high analysis, yet is safe to use through delicate parts of the season such as flowering and fruit set. Eco-Prime® Avocado provides a very simple one-step complete nutritional benefit, including Nitrogen – without causing tree or soil imbalances.

**Mineral Protection** - Silicates harden roots, supplied through Eco-Prime® Avocado (which is a Silicate mineral fertiliser), and Potassium Silicate in conjunction with Eco-Humate to ensure systemic uptake; it is possible to harden avocados against root damage, especially in the presence of subsoil Aluminium.

**EcoAdvance® Premium Biology** - Ecogrowth's EcoAdvance® premium biology is our proprietary granular fertiliser inoculum, containing select strains of beneficial soil microbes and complementary bio-stimulants.

fertiliser for life

AVAILABLE IN 20KG & 500KG/1 TONNE BULKA BAGS

For alternative applications or to arrange a soil/plant test please contact your Ecogrowth® nutritional expert.
