ECO-WET®

Soil wetter for rapid long lasting response

pH 10.5

Typical uses and benefits include:

- · Suitable for a range of soil types
- Spreads and retains moisture in the top-soil
- Contains proprietary non-ionic surfactants and natural water-holding polymers

Eco-Wet® is unique soil wetter designed for fast water penetration with longevity; that holds water in even the sandiest soil. Most soil wetters have one or two of these properties, rarely all three. Eco-Wet® demonstrates its ability to hold moisture by spreading water through the soil profile like ink on blotting paper. These characteristics make Eco-Wet® ideal for irrigation, boom, in furrow and tanker application.

Eco-Wet® has a fast acting formulation that enhances soil structure and encourages beneficial microbial activity in order to maintain long lasting wet-ability in waxy sands, heavy clays and normally water repellent soils. Eco-Wet® differs from normal soil wetters, containing natural polymers, which physically improves the soil structure without damaging it. The added natural polymer acts like a sponge, creating a long-lasting wetting effect that can continue for a long period of time.

COMPLEMENTARY PRODUCTS

express® NPK

Complete liquid fertiliser for balanced growth.

ECO-VITAL®

A premium natural liquid kelp and fish fertiliser.

ECO-HUMATE®

Concentrated liquid humus soil conditioner.

fertiliser for life

AVAILABLE IN 1L, 2L RTU, 5L, 2OL, 2OOL, IBC & BULK

ECO-WET®

Soil wetter for rapid long lasting response

APPLICATION RATES

Crop	Rate	Notes
STANDARD LAWNS	300ml/100m ² 1:100 min. dilution	Apply at cool time of the day and water in well. If applying lower than recommended water rate, irrigate in well.
GREENS PREMIUM TURF	500ml/100m ² 1:100 min. dilution	Apply every 3-4 months if required. Water in well after application.
FAIRWAYS	1-2L/ha 1:25 min. dilution	Water in with irrigation immediately after application.
BROADACRE (Based on 9-12" spacing)	1-3L/ha 1:15 min. dilution bare soil 1:25 min. dilution plant & soil	Apply to surface of soil, do not incorporate until minimum 15mm rainfall event has occurred.
BROADACRE IN-FURROW	1-3L/ha 1:25 min. dilution	Apply through a strong jet, as close to ground as possible. Avoid burying under soil as this will prevent product from working.
IRRIGATION INJECTION	1-2L/ha	Apply as required through growing season.
TANKER VERGE TREATMENT	1:1000 min. dilution	Apply to soil at base of shrub or tree. Avoid excess contact with leaves.
HOME GARDEN, LAWNS & POTS	30ml/10m ² 1300 min. dilution	Apply every 8-12 weeks or as required.
