

# ECO-WET®

Soil wetter for rapid long lasting response

pH 10.5

SG 1.06

## Typical uses and benefits include:

- Suitable for a range of soil types
- Spreads and retains moisture in the top-soil
- Contains proprietary non-ionic surfactants and natural water-holding polymers

Eco-Wet® is a unique soil wetter designed for fast water penetration with longevity; that holds water in even the sandiest soil. Most soil wetters have one or two of these properties, but rarely all three. Eco-Wet® demonstrates its ability to hold moisture by spreading water through the soil profile like ink on blotting paper. These characteristics make Eco-Wet® ideal for irrigation, boom, in-furrow and tanker applications.

Eco-Wet® has a fast-acting formulation that enhances soil structure and encourages beneficial microbial activity in order to maintain long-lasting wet-ability in waxy sands, heavy clays and normally water-repellent soils. Eco-Wet® differs from normal soil wetters, containing natural polymers, which physically improves the soil structure without damaging it. The added natural polymer acts like a sponge, creating a long-lasting wetting effect that can continue for a long period of time.

## COMPLEMENTARY PRODUCTS

### express® NPK

Complete liquid fertiliser for balanced growth.

### ECO-VITAL®

A premium natural liquid kelp and fish fertiliser.

### ECO-HUMATE

Concentrated liquid humus soil conditioner.

fertiliser for life

AVAILABLE IN 1L, 2L RTU, 5L, 20L, 200L, IBC & BULK

For alternative applications or to arrange a soil/plant test please contact your Ecogrowth® nutritional expert.

### APPLICATION RATES

Crop	Rate	Notes
<b>STANDARD LAWNS</b>	300ml/100m <sup>2</sup> 1:100 min. dilution	Apply at a cool time of the day and water in well. If applying at a lower than recommended water rate, irrigate in well.
<b>GREENS PREMIUM TURF</b>	500ml/100m <sup>2</sup> 1:100 min. dilution	Apply every 3-4 months if required. Water in well after application.
<b>FAIRWAYS</b>	1-2L/ha 1:25 min. dilution	Water in with irrigation immediately after application.
<b>BROADACRE</b> (Based on 9-12" spacing)	1-3L/ha 1:15 min. dilution bare soil 1:25 min. dilution plant & soil	Apply to the surface of the soil, do not incorporate until a minimum 15mm rainfall event has occurred
<b>BROADACRE IN-FURROW</b>	1-3L/ha 1:25 min. dilution	Apply through a strong jet, as close to the ground as possible. Avoid burying under the soil as this will prevent the product from working.
<b>IRRIGATION INJECTION</b>	1-2L/ha	Apply as required through the growing season.
<b>TANKER VERGE TREATMENT</b>	1:1000 min. dilution	Apply to the soil at the base of the shrub or tree. Avoid excess contact with leaves.
<b>HOME GARDEN, LAWNS &amp; POTS</b>	30ml/10m <sup>2</sup> 1:300 min. dilution	Apply every 8-12 weeks or as required.
