Typical uses and benefits include:

- **Ideal for structural development and growth**
- **An efficient N source with added Trace Elements**

Express® NK +TE is a High Nitrogen liquid fertiliser, balanced with Phosphorus, Potassium and a full chelated trace.

Express® NK +TE delivers growth and strength, suited to high production crops, where yield is the goal without sacrificing quality. Express® NK +TE is suited to harsh conditions where other nitrogen sources fail to deliver such as arid environments and semi sodic conditions.

Express® NK +TE can be applied foliar or to the soil through in furrow techniques and drip irrigation. Express® NK +TE is gentler than average liquid Nitrogen fertiliser products, ensuring it softer to handle and less corrosive on machinery fittings.
