For tank mixes
 Add water first, then add first product; stir/dissolve; then add second product.

*Disclaimer:
 this chart is provided as a guide only*

Compatibility	
High	Can mix without dilution
Compatible	Minimum safe dilution = 1:10
Low	Minimum safe dilution = 1:40
Never	Incompatible at any concentration

Agricultural use	
High	Can mix in all standard conditions
Compatible	First product diluted (1:20-40) BEFORE adding second product
Low	First product diluted (1:50-100) BEFORE adding second product
Never	DO NOT MIX under any circumstances

Eco Growth is Australia's leading manufacturer of biologically activated fertilisers
