Typical uses and benefits include:

- Contains plant and beneficial microbe stimulants
- Improves crop productivity and finish quality
- Reduces plant stress
- Feeds both plant and soil

Eco-Vital® is a premium natural kelp and fish fertiliser with plant extracts that delivers rapid results. It contains nutrients in a naturally chelated form. Chelates are known to be up to 90% more efficiently absorbed by plants than raw elemental fertilisers. This makes the required rates lower and the speed of their absorption and utilisation higher.

Eco-Vital® increases crop production, improves quality, reduces plant stress and feeds both the plant and soil. Rich in natural Nitrogen, Phosphorus, Potassium and over 15 trace elements, Eco-Vital® is the premium choice.

COMPLEMENTARY PRODUCTS

express® NPK
Complete liquid fertiliser for balanced growth.

potassium SILICATE
Premium silica & potassium liquid fertiliser.

express TRACE
Premium trace element liquid fertiliser.

fertiliser for life

AVAILABLE IN 1L, 2L RTU, 5L, 20L, 200L, IBC & BULK
