Typical uses and benefits include:

- P, K and TE fertiliser
- Suits low & high PBI soils
- Suits sodic soils
- Biologically Activated

Eco-Prime® Natural + K is a prilled Soft Rock and Sulphate of Potash fertilisers impregnated with Eco Advance® premium biology.

Phosphorus availability and speed of delivery are increased through to utilisation of colloidal soft rock, palagonite, lime, rock minerals and gypsum which is ground to a fine powder and reconstituted into a prill inoculated with EcoAdvance® premium biology, including Phosphorus stabilisers Bacillus megaterium, mobilisers VAM spp and plant Phytohormone producers that help stimulate root growth.

Bio-phosphate is typically not bound by high PBI soils, resulting in increased Phosphorus availability with continued use.

fertiliser for life

AVAILABLE IN 20KG & 500KG/1 TONNE BULKA BAGS

For alternative applications or to arrange a soil/plant test please contact your Ecogrowth® nutritional expert.

NATURAL + K

Rock mineral fertiliser for pastures, crops, orchards & vegetables
