Typical uses and benefits include:

- Volcanic, soil remineraliser
- P, K and TE fertiliser
- Suits low & high PBI soils
- Suits sodic soils
- Biologically Activated

Eco-Prime® Natural is a prilled volcanic-based fertiliser enhanced with soft rock phosphate and EcoAdvance® premium biology.

Nutrients are provided in a bio-available form via soft rock phosphate combined with carbon, lime, rock minerals and gypsum. Materials are ground to a fine powder to maximise specific surface area and reconstituted into a granule inoculated with EcoAdvance® premium biology, which includes phosphorus solubilising Bacillus spp., nutrient mobilising VAM spp. and plant phytohormone producers that help stimulate root growth.

Bio-available nutrients are typically not bound by high PBI soils, resulting in increased Phosphorus availability with continued use.

fertiliser for life

AVAILABLE IN 20KG & 500KG/1 TONNE BULKA BAGS

For alternative applications or to arrange a soil/plant test please contact your Ecogrowth® nutritional expert.

NATURAL

Rock mineral fertiliser for pastures, crops, orchards & vegetables

APPLICATION RATES

Product	Rate	Timing
PASTURE, CROPS, VEGETABLES, VINEYARDS	150-300+kg/ha	As required.
IRRIGATED	150-500kg/ha	As required.

COMPLEMENTARY PRODUCTS

potassium SILICATE
Premium silica & potassium liquid fertiliser.

express® TRACE
Premium trace element liquid fertiliser.

ECO-VITAL®
A premium natural kelp and fish liquid fertiliser.
