Typical uses and benefits include:

- Superior crop yield
- Improved soil porosity, infiltration & water holding
- Biologically activated

The BKH range is rich in natural minerals and enhanced with the addition of EcoAdvance® premium biology, Potassium Humate and Boron. The range enables nutrient uptake whilst encouraging a symbiotic relationship between plants and soil microbiology. EcoAdvance® premium biology works in conjunction with Potassium Humates to deliver Nitrogen in a sustained release. The BKH range also has added Silicon, Calcium and trace elements plus fortified levels of Boron and Potassium Humate. All these elements combine to create an environment where soil biology can thrive and improve plant vigour.

The result is faster, longer-lasting complete nutrition, creating strong consistent growth over mixed soil types and robust plants to tolerate varied environmental conditions. Plus, long-term benefits include improved soil conditions from biological activity, compaction relief, deeper root growth, healthier plants and humus increases.

fertiliser for life

AVAILABLE IN 20KG & 500KG/1 TONNE BULKA BAGS
For alternative applications or to arrange a soil/plant test please contact your Ecogrowth® nutritional expert.

SF35 BKH

High Boron, Potassium & Humate
blend

APPLICATION RATES

Product	Rate	Timing
HORTICULTURE, BROADACRE & PASTURE	150-300kg/ha	Throughout the year as required.

COMPLEMENTARY PRODUCTS

potassium **SILICATE**
Premium silica & potassium liquid
fertiliser.

express® **TRACE**
Premium trace element liquid
fertiliser.

ECO-VITAL®
A premium natural kelp and fish
liquid fertiliser.
