Typical uses and benefits include:

- Discrete 1-2mm.
- Sustained release.
- Low leaching.
- Biologically activated.

Ecogrowth Emerald Mini Prill fertiliser is a complete rock-mineral NPK turf fertiliser designed to enhance the appearance, consistency and playability of premium sports turf surfaces.

Ecogrowth Emerald Mini Prill is designed to discretely optimise premium turf areas by selectively balancing nutrition to promote strong root growth and improved leaf strength – leading to hard-wearing and tightly knitted playing surfaces.

Our unique combination of natural, mineral-based NPK and trace elements is further enhanced through the addition of beneficial microbes that encourage and stimulate soil/plant interactions.

For best results, use in conjunction with our soil wetter, Eco-Wet[®].

fertiliser for life

AVAILABLE IN 20KG, 500KG/1 TONNE BULKA BAGS

For alternative applications or to arrange a soil/plant test please contact your Ecogrowth[®] nutritional expert.
