Typical uses and benefits include:

- Improves soil conditions.
- Compaction relief.
- Deeper root growth.
- Biologically activated.

Pasture Boost is a unique combination of sulphate of ammonium and soft rock phosphate enhanced with EcoAdvance® premium biology. Rich in nitrogen and phosphorus Pasture Boost also includes calcium, Silicon and fortified levels of trace elements all combining to create a biologically friendly environment.

The result is faster longer lasting complete nutrition, creating strong consistent growth over mixed soil types and robust plants to tolerate varied environmental conditions. Plus, long-term benefits include: Improved health from biological activity, increased water and nutrient holding capacity, compaction relief, deeper root growth as well as a greater resistance to soil pathogens and pests. Pasture Boost pastures are nutrient-dense with high total dry matter, increased palatability and improved cattle contentment resulting in a rising plane of animal health and fertility.

fertiliser for life
