## Typical uses and benefits include:

- Full analysis liquid fertiliser.
- 100% solution for permanent fertigation (requires no stirring).
- Contains Myco Active biostimulant.
- Protects & promotes root growth.
- Ideal for Spring to Autumn fertigation use.

Express<sup>®</sup> Apex is a balanced, high-analysis liquid fertiliser and biostimulant designed to stick to the soil and stay around the roots. This is accomplished by incorporating Myco Active, a clever biostimulant that aids with chelation of fertiliser whilst stimulating beneficial microorganisms and promoting root activity.

Express<sup>®</sup> Apex is balanced to supply nitrogen in ratio with potassium, trace elements, plus boosted magnesium and Iron - all buffered with a natural chelate to provide sustained release and better utilisation. This is important as we aim to grow and size fruit, not stimulate unproductive nitrogenous growth.

## COMPLEMENTARY PRODUCTS

### ECO-VITAL<sup>®</sup>

A premium natural kelp and fish liquid fertiliser.

### express<sup>®</sup> TRACE

Premium trace element liquid fertiliser.

### ECO-HUMATE

Concentrated liquid humus soil conditioner.

**fertiliser for life**

AVAILABLE IN 20L, 200L, IBC & BULK

For alternative applications or to arrange a soil/plant test

## APPLICATION RATES

Crop	Rate	Notes
<b>YOUNG FRUITING TREES</b>	15-25L/ha irrigated ~80ml/tree 1:500 min. dilution	Every 7-14 days or as required.
<b>MATURE FRUITING TREES</b>	25-50L/ha irrigated ~160ml/tree 1:150 min. dilution	Every 7-14 days or as required.

Application Rates based on 300 trees/ha. Express<sup>®</sup> Apex contains Ecogrowth's Myco Active root stimulant.

For best results fertigate between monthly under tree applications of Eco-Prime<sup>®</sup> Avocado or Purple<sup>®</sup> granular fertilisers; which supply the backbone for seasonal fruiting consistency and retention under high production conditions, and balance seasonal requirements with complementary calcium, boron etc as seasonally required or indicated by soil and plant tissue analysis.

Express<sup>®</sup> Apex should be fertigated through irrigation, or applied diluted to root zone.

<b>TURF</b>	15-20L/ha 1:80 min. dilution	As required for a green boost.
<b>GENERAL VEGETABLE</b>	8-15L/ha 1:100 min. dilution	As required.
